Zirconia Sensors

- Count the number of wires on the original sensor.
- Check the colour of the wires.
 - If the sensor has black, grey, purple or white wires, it will be a **Zirconia Sensor**.
 - If the sensor has one **red wire** with the possible exception of some Japanese vehicles, it will be a **Titania Sensor**.
- If it is a **Titania Sensor** then check the original thread size of the sensor.
- Zirconia Sensors** and **Titania Sensors** are not interchangeable.

Common Wire Colour Variations

Toyota Applications

These wire colours can be seen on many Toyota applications with either zirconia, thick film or lean burn Lambda sensors. It is therefore necessary to identify the type of Lambda sensor fitted to the vehicle to be sure of its compatibility with the replacement sensor.

Honda Applications

These wire colours can be seen on many Honda applications with either zirconia, thick film or lean burn Lambda sensors. It is therefore necessary to identify the type of Lambda sensor fitted to the vehicle to be sure of its compatibility with the replacement sensor.

Peugeot Applications

AC Delco Applications

The wire colours and correct fitment for the **CARGO** universal Lambda sensors are shown on the quick reference chart on page 21.
