Quality System

Since the role of quality system and quality assurance in manufacturing and supplies of automotive components is crucial, FENOX pays utmost attention to development of the quality system at its production facilities. Consistent with the quality system's tasks, modern quality management technologies were introduced in all the company's divisions, namely, those compliant with the ISO 9001, QS 9000, adopted by the USA car manufacturers (Chrysler, Ford, General Motors); as well as compliant with the VDA 6.1 quality standard of the associated industry of Germany.

Among the main indicators distinguishing the exceptionally high quality level of the FENOX automotive components the company was awarded ISO/TS 16949. This combined quality certificate for manufacturers of assembly units and components for the global automotive industry was adopted by the International Automotive Task Force (IATF) and Japan Automobile Manufacturers Association (JAMA).

- Increases braking efficiency
- Prevents creaking during braking
- Protection guides from souring and corrosion
- Elasticity and tightness of rubber parts
- Protection of brake pads from sticking
- Lightweight piston stroke in the cylinder
- Prevents uneven wear of pads
- Resistant to water washout, the aggressive action of reagents and salts from roadway
- Prevents corrosion and seizing of parts
- Is not mixed with brake liquid DOT 3, DOT 4, DOT 5.1

Antifreeze

▶ ANTIFREEZE FENOX of red color (AF1252 – 1kg, AF5252 – 5kg)

- corresponds to the category G12 according to the classification of Volkswagen.
- recommended for use in modern cars with engines containing alloys of non-ferrous metals .
- working temperature range from -40° to 110°C.
- increased interval of exploitation.
- contains a fluorescent dopant.

▶ ANTIFREEZE FENOX of green color (AF1255 – 1kg, AF5255 – 5kg)

- corresponds to the category G12 according to the classification of Volkswagen.
- perfect for vehicles with engines which parts are designed from ferrous and non-ferrous metals.
- working temperature range from -40° to 110°C.
- exploitation interval is 3 years.
- contains a fluorescent dopant.

▶ ANTIFREEZE FENOX of blue color (AF1151 – 1kg, AF5151 – 5kg)

- corresponds to the category G11 according to the classification of Volkswagen.
- perfect for vehicles with engines which parts are designed from cast iron.
- working temperature range from -35° to 110°C.
- exploitation interval is 3 years.
- contains a fluorescent dopant.
